SUFFOLK CLINIC LEADS THE WAY WITH REVOLUTIONARY NEW TREATMENT

A Suffolk-based medical clinic is to become one of the first of its kind in the UK to offer a unique cosmetic treatment.

The Suffolk Medical Clinic, based in Boxford, near Sudbury was one of only 10 clinics in the UK to be included in the clinical trials for revolutionary new product, Juvéderm® ULTRA.

The Juvéderm® ULTRA range of products are an advanced, smooth formulation of hyaluronic acid dermal fillers for longer-lasting correction of moderate to severe facial wrinkles and folds.

It has been tested by over 60 clinics across Europe, with over 90 per cent of patients and practitioners rating the results and satisfaction levels as excellent or good.

Jenny O'Neill RGN, practicing partner at Suffolk Medical Clinic, said: "We were delighted to be one of the few clinics in the UK to test this new filler and are also proud to be the only clinic in Suffolk currently offering this impressive treatment.

"Juvéderm® ULTRA is unique as it is the only hyaluronic acid dermal filler currently on the market that contains the anaesthetic lidocaine. This provides a gentle, pain-free injection experience that allows our patients to really 'feel the difference' and achieve a smooth, natural look and feel."

PRESS RELEASE

Jenny added: “With one in five Britons considering some form of cosmetic surgery we are treating more and more patients who are no longer prepared to accept wrinkles as a fact of life. We can offer patients simple, non surgical treatments such as Juvéderm[®] ULTRA to help smooth away wrinkles and maintain a more youthful appearance.

“Hyaluronic acid is a natural component of the skin which normally provides elasticity and resilience. The ability of cells to produce hyaluronic acid diminishes with age, often resulting in the formation of facial wrinkles and folds as the skin loses volume. Fillers such as Juvéderm[®] ULTRA can be injected in small doses to temporarily fill and augment the treated area.”

Juvéderm[®] ULTRA is the only hyaluronic acid filler on the market to be approved by America’s Food and Drug Administration as lasting up to one year. Other fillers will only last for six to nine months.

Suffolk Medical Clinic is Healthcare Commission registered and approved and is run by Jenny and her partner Dr Anthony O’Neill MB., BS. The clinic specialises in medical cosmetic treatments such as injectable implants, botox injections, collagen replacement therapy, laser and IPL skin treatments.
